We provide bioanalytical, pharmacokinetic, pharmacology, and custom chemical synthesis services. CanAm Bioresearch is currently accepting applications from qualified individuals to contribute to the company's growth.

Job Title: RESEARCH ASSOCIATE
Department: Chemistry

Description:

The Research Associate's primary responsibility is to synthesize target compounds as per the direction of his/her team leader.

Duties and Responsibilities:

1. Synthesize assigned target compounds (typically multi-step organic synthesis) under the supervision of the team leader.
2. Employ established techniques for compound purification (column chromatography, HPLC) and identification (NMR, MS etc).
3. Provide input into synthetic processes employed in the synthesis of target compounds.
4. Provide supervisor with written periodic progress reports and project final reports.
5. Participate in general laboratory duties (i.e. maintenance of compound library, purchase order records, vacuum pumps, manifold, lyophilizer, etc).
6. Perform duties in a safe manner in keeping with the Health and Safety Act.

Interactions:

Interacts with vendors regarding material, equipment purchases, equipment repairs and service contracts.

Qualifications:

1. BS in Chemistry (preferably specializing in Organic Chemistry), Chemical Biotechnology or a related field or equivalent experience, and 3-6 years industrial experience.
2. Good communication skills.
